(FOR KEY SEE REVERSE)

The USSR has delivered 200 metric tons of 16 mm. plate to VEB Peenewerft Wolgast. The plate cannot be utilized, however, and means of disposing of it are now being sought. The plate is unusable because a layer 0.75 mm. thick must be abraded from each surface of the plate before it can be welded; the resulting plate is then only 14.5 mm. thick.
